

TRAINING

Responder5 Hardware & Diagnostics

This course is designed to give the attendee hands on experience with the Responder 5 physical devices and diagnostic troubleshooting. This two day course will be held at IMA's Solution Center located downtown St. Paul, Minnesota. This course will be conducted in IMA's Solution Center so all attendees will have the benefit of exploring the devices and software as hands on exercises in a "real" environment.

Topics Include:

- Daily System Operations
- End User Perspective
- Monitoring Activity
- System Layout
- Cabling and Power Requirements
- Cable Termination
- Server Layout
- Head End Installation & Networking
- Console & Workflow Installation & Adjustments
- RGS Diagnostics
- R5 Applications Diagnostics

Course Fee:

The course fee will cover course materials, instruction, hotel accommodations for 2 nights, transportation to class from hotel and airport, and meals/snacks while on-site.
